EDUCATION

Emilio Aguinaldo College – Cavite, Philippines

Bachelor of Science in Computer Science

2018 – 2023

- Honors: Merit Scholar, 2nd Semester 2021; Varsity Scholar, AY 2018–2022

EXPERIENCE

Rampiere IT Solutions

Cavite, Philippines

Software Developer (Full-time)

October 2022 – August 2026

Software Developer (Freelance / Part-time)

August 2026 – Present

- Full-stack developer across a portfolio of Angular/Ionic products for retail, food-service, and ERP clients — from UI to REST API integration to native Android/desktop builds
- Build and maintain production POS, ERP, and payroll systems used across multiple branches, integrating payment gateways (Xendit, GCash), Firebase push notifications, and hardware (thermal printers, Bluetooth LE, barcode devices)
- Design and consume RESTful APIs with JWT authentication; contribute to a companion Java REST API backend for one ERP product
- Automate internal operational workflows using n8n, chaining database triggers to team chat notifications
- Deploy applications across Android (Capacitor), Windows desktop (Electron), and web/PWA targets

ICargo Pacific, IT Department

Front-End Developer Intern

July 2022 – August 2022

- Developed the company's Merchant Interface Website
- Integrated Application Programming Interfaces (APIs) into the website
- Assisted the assigned development team on daily tasks

PROJECTS

Rampiere POS (*Angular, Ionic, Capacitor, Electron*) — Point-of-sale system with sales terminal, inventory, cash drawer, and kitchen-screen modules; checkout integrated with Xendit and GCash; shipped as an Android app and a Windows desktop app

SOAR+ Next (*Angular, Ionic, Capacitor, Java REST API*) — Field-operations ERP mobile app for a multi-branch food distribution client — sales order entry, inventory movements, physical inventory counts, and warehouse picklist/packlist processing, with role-based logins for crew, driver, and warehouse accounts, Firebase push notifications, and PDF delivery confirmations with digital signatures; also maintain a franchise-specific variant of the same app

Paypiere (*Angular*) — Payroll and workforce management dashboard for employee scheduling, attendance tracking, and manpower planning

Biometrics Verification App (*Ionic, Capacitor*) — Identity verification app using the device camera to scan QR codes

SKILLS

Frontend: Angular (v14–19), TypeScript, JavaScript, HTML/CSS, Bootstrap, RxJS

Mobile & Desktop: Ionic, Capacitor (Android/iOS), Electron

Backend & APIs: Node.js, Express, Java, REST API design/integration, JWT authentication, reverse proxy servers

Payments & Messaging: Xendit, PayMaya SDK, GCash QR, Firebase Cloud Messaging

Automation & Data Viz: n8n workflow automation, Chart.js, ngx-charts, pdfmake

Hardware Integration: Thermal printers, Bluetooth LE, Web Serial API, QR code scanning

AI: AI chatbot integration, OpenAI API, other LLMs (familiar)

ERP: iDempiere

Other Tools: Git, PostgreSQL, PHP, Python (familiar), basic networking

Operating Systems: Windows, Ubuntu, Debian; virtual machines (VirtualBox, VMware)

Certification: Complete Web Development, Programming Hero (September 2022)

Languages: English, Filipino
